O&G confirmed at University of Herfordshire

Posted by: Charlie Kortens In Announcements, Contracts, Facilities Management, Industry, News 6 days ago

Office & General (O&G) has been confirmed as the new facilities services provider for University of Hertfordshire in a ten year contract worth in excess of £55M.

The work won by O&G encompasses the whole of the University's academic estate and includes planned and reactive maintenance, statutory compliance work as well as services ranging from grounds maintenance and cleaning to hygiene, pest control and helpdesk services.

Andrew May, Director of Estates, Hospitality and Contract Services at the University of Hertfordshire said:

"The University of Hertfordshire is delighted to be working with O&G and I am hugely excited by the benefits this partnership will bring to our students, staff and visitors. As well as improving the quality of service delivery, O&G are able to make efficiency savings and introduce commitments to the partnership that are completely aligned to the University's corporate strategy of becoming internationally renowned as the UK's leading business facing university."

Tim Hancock, chief executive of O&G said:

"This is a fantastic opportunity to build on what is already a strong relationship with the University. Our work will touch upon the lives of everyone living and working within the University and everything we do will be defined by excellent customer service. It means everyone working together; no division of roles, but working smarter to deliver solutions using the best fit technology. The goal is for everyone to work together with the sole aim of delivering excellence to students, staff and the wider UH community. It is an exciting prospect and a great testimony to our people and the vision of the University's estates team."

The University of Hertfordshire is located in Hatfield twenty minutes from central London and has two main campuses, College Lane and de Havilland, which are situated less than a kilometre apart and are home to approximately 25,000 students studying in ten schools.
